

## PRESS RELEASE

Casablanca - April 2026

Collins Aerospace & Böllhoff

Press use only

### Böllhoff expands operations in Casablanca to support the aerospace supply chain

Böllhoff Morocco, established in 2024, consolidates a long-standing industrial collaboration with Collins Aerospace through its production facility dedicated to machined aerospace components, in the context of a sustained ramp-up on the A320 program.

For several years, Ratier-Figeac — part of Collins Aerospace, which is an RTX business— has been assembling its cockpit and cabin sub-equipment at its Nouaceur site – on the outskirts of Casablanca – to deliver to Airbus in support of its A320 program and related ramp-up activities under tight deadlines.

It is in this context that Böllhoff has established a dedicated production site in Casablanca, specialising in small machined mechanical parts for the aerospace market. Customer-drawing parts, manufactured with the precision and rigour demanded by the aerospace supply chain — and EN9100-certified since 2025.

Geographic proximity is intended to increase flow efficiency, streamline lead times, and contribute to supply chain resilience.

This collaboration builds on a long-standing business relationship between **Collins Aerospace and Böllhoff SNEP**, one of the Group's French entities, and introduces a new phase of cooperation under a multi-year contract within the Moroccan aerospace ecosystem.

"This site embodies our ability to adapt to the needs of our strategic customers, wherever they operate. Casablanca is not a default choice — it is a choice for performance." — Wissem Ellouze, Co-CEO Europe, Böllhoff Group

Morocco is establishing itself as a leading aerospace hub. Böllhoff is taking its rightful place.
